Journal Description : International Journal of Advances in Soft Computing Technologies an international journal promoting an integrated view of latest developments in soft computing to solve real life problems. Soft computing is a collection of methodologies, which aim to exploit acceptance for imprecision, uncertainty and partial truth to achieve tractability, robustness and low solution cost. It is publishing original research papers, reports, reviews and commentaries in all areas of computer science, information technology and latest developments related computers with all engineering, science and technologies as in print. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process.
